

# the **SIPer**<sup>TM</sup>

## A Subsurface Irrigation Planter

**Easy. Efficient. Portable.**

A convenient planter!

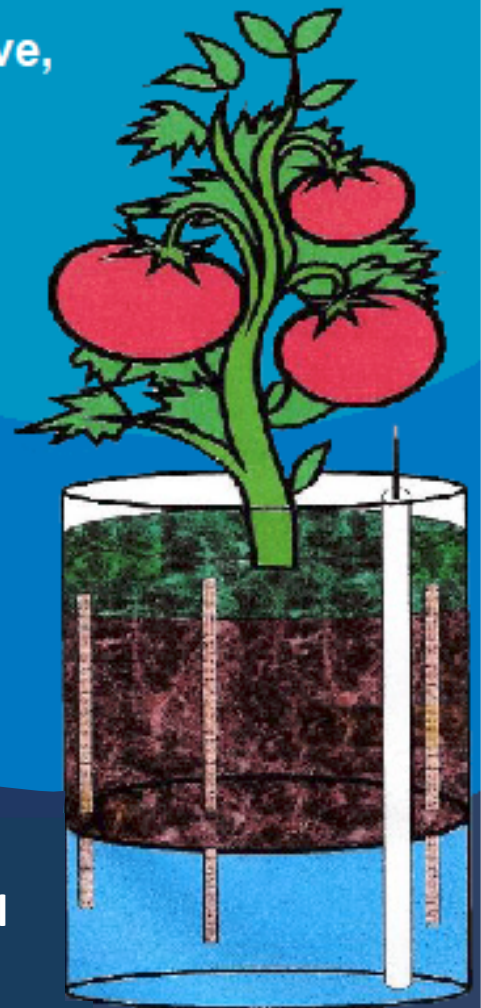

No matter what you grow or where you live,  
the SIPer<sup>TM</sup> can meet your needs.

SIPer<sup>TM</sup> compared to a  
conventional garden uses

- . 1/3 the water
- . 1/3 the soil
- . 1/3 the time

What is a SIPer<sup>TM</sup>?

Basically it's a 5 gallon recycled bucket with a bottom water reservoir separated from the soil layer by a divider. Through the use of wicking strips, water is transferred to the soil as needed.

Used for Education (workshops and seminars), Fundraising (with/without a plant), and Food(grow all year with sun/LEDS)
